On the most recent iOS 17/18/26 updates, several reports of the Apple new widget not loading, appearing blank or black, and more. For this reason, we've put up useful advice on several efficient ways to fix iOS 17/18/26 widgets that aren't working. Way 1. Restart Your iPhone or iPad Way 2. Remove the Widget and Re-add Way 3.

Why are my widgets not working?

Poor internet connection: Widgets can't load information properly if you have internet problems. System bugs: Bugs in the new macOS may cause widgets to malfunction. Corrupted Notification Center: If there are issues with the Notification Center, the widgets that reside in it won't cooperate.

What if the widget is from my Mac or iPhone?

If the widget is from your Mac, there will be no words. If the widget is available on your Mac and iPhone, you can choose the one "On This Mac" or "From iPhone." Note that the iPhone widgets may appear blank at the beginning, but they will load up correctly after a few seconds.

How to fix iPhone widgets not working?

The best action in that situation is to upgrade your iPad or iPhone. To accomplish this, navigate to Settings > General > Software Update and download the most recent version of iOS or iPadOS, which has probably solved the flaw that causes iPhone widgets not working. While updating to the newest iOS or jailbreaking our iDevice, issues might arise.
