What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Are eco-friendly cargo shipping containers a viable solution?

Traditional shipping containers, typically made from energy-intensive materials like steel and aluminum, not only leave a substantial carbon footprint but also pose challenges in terms of waste disposal and recyclability. As the industry evolves, a promising solution emerges in the form of eco-friendly cargo shipping containers.

What is compact containers?

Compact Containers serves the global shipping and intermodal industry with an efficient, low-cost means to transport containers by Road, Rail, or Sea. Discover the future of cargo logistics with Compact Containers. Our SeaFold 40' collapsible containers redefine efficiency & cost savings.

Are eco-friendly containers a good investment?

One of the primary barriers to the widespread adoption of eco-friendly containers is the high initial investment required. The costs associated with research, development, and production of sustainable materials and technologies can be significant, posing financial challenges, especially for smaller shipping companies.

Your Professional background? What Causes 'Empty Running'? Who Inspires You? Empty containers clog roads and ship terminals, causing port congestion and leaving little space to unload ships. This then forces many ships to wait offshore, wasting resources and slowing the supply chain to a crawl. The problem disappears only as the ships sail away.
