100ah power station in China in Thailand

Overview

Who owns 115 kilovolt substation in Udon Thani?

The 115-kilovolt substation in Udon Thani. The 115-kilovolt substation in Udon Thani, Thailand, built by POWERCHINA in an EPC (engineering, procurement and construction) model, was recently handed over, which reflects the high-quality localized performance of POWERCHINA. The project owner is EGAT (Electricity Generating Authority of Thailand).

Why are China's power stations important?

China's power stations are a cornerstone of the nation's rapid industrialization and economic growth. As the world's largest energy consumer, understanding the intricacies of China's power generation landscape is crucial.

What is China's Energy Strategy?

China's energy strategy encompasses a wide range of power stations. Traditional fossil fuel plants, primarily coal-fired, still play a crucial role, although their share is decreasing. Simultaneously, there is a massive push towards renewables, evidenced by the rapid deployment of wind and solar farms, as reported by abc.net.au.

What does powerchina do?

POWERCHINA is responsible for the upgrade and expansion of a 115kV substation, the installation of two new 22kV cable-to-overhead lines to the PEA (Provincial Electricity Authority) station, the construction of a control building, a 22kV switchgear room, and fire protection upgrades.
