Overview

KIRYANDONGO, Uganda, Aug. 22 (Xinhua) -- Chinese-built Karuma Hydropower Plant, in north-central Uganda's Kiryandongo District, has successfully launched the fourth of its six turbine sets and synchronized it to the national grid, taking the project one step closer to completion. Where is Uganda's largest hydropower plant located?

The Karuma Hydropower Plant, with a total designed installed capacity of 600 MW, is located in mid-northern Uganda in East Africa. In early 2024, Uganda launched the last unit of six turbines at the plant and synchronized it on the national grid, marking its full operation as Uganda's largest hydropower plant. Power generation boosted.

Will Uganda's power plant be a tourism site?

At the same time, Uganda's tourism sector is set to promote the plant as a tourism site to benefit the lives and incomes of locals. The Uganda Tourism Board (UTB), Uganda Electricity Generation Company Ltd., and manager of the power plant have signed a partnership to package and market the superstructure and related tourist products.

Why did President Museveni congratulate China for building a power plant?

Ugandan President Yoweri Museveni, who has visited the project several times, thanked China for financing the construction of the power plant, noting that it will be important in providing adequate electricity to fast track the economic development of Uganda.

What happened to Uganda's Electricity price?

But after the plant commenced commercial operations on June 12, the electricity price in the country was reduced by 17.5 percent, making electricity more affordable, according to the Ugandan government.
