1gw energy storage project

Overview

What is the energy storage project?

The Gilboa pumped storage power plant is an energy storage project that involves constructing a power plant to pump water from a low-level reservoir to a high-level reservoir, with a height difference of 574 meters. This environmentally friendly plant complements the unique landscape of the North of Israel.

Where is Tesla's gigawatt-hour-scale energy storage station located?

The gigawatt-hour-scale energy storage station is to be located in the Lin-gang Special Area of China (Shanghai) Pilot Free Trade Zone, as per the deal signed by Tesla, the administrative committee of the Lin-gang Special Area, the people's government of Shanghai's Fengxian District, and China Kangfu International Leasing Co., Ltd.

Will Tesla's first grid-side energy storage station be built in China?

It will be Tesla's first grid-side energy storage station to be built on the Chinese mainland. Dong Kun, general manager of Tesla China's energy business, said the station, once launched, will participate in electricity spot trading, helping balance peak and off-peak power demand in the local grids and enhance grid stability.
