20kva uninterruptible power supply

Overview

What is a 1000 volt UPS (uninterruptible power supply)?

1000VA UPS (Uninterruptible Power Supplies) are used for smaller power protection applications, like backup up a few computers or EPOS. This means that they can be used by homeowners, in offices or in stores. We source UPS from a wide range of UPS systems manufacturers. You can find more information here: [Riello UPS](#) [Eaton UPS](#) [APC UPS](#).

What is a 3kva uninterruptible power supply?

3kVA uninterruptible power supplies are designed to power loads up to 3kVA but the kilo-Watt loading will depend on the UPS output power factor. Typical loads for a 3kVA UPS include file servers, storage devices IT networks and VoIP telecoms systems.

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What is a modular power supply unit?

Modular power supply units like these use the least energy of all standalone UPS units, and therefore cost the least to power and maintain over time, even at the high-load levels of power needed to support networks and data centers. Modular UPS units are comparable to upgraded and higher-load rackmount UPS units.
