30 000 outdoor base stations

Overview

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023 Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.

Who makes 5G base station equipment?

19. The top 5 telecom equipment providers for 5G base stations are Huawei, Ericsson, Nokia, ZTE, and Samsung. When it comes to 5G base station equipment, five companies dominate the market: Huawei, Ericsson, Nokia, ZTE, and Samsung. These firms provide the hardware and software needed to power the world's 5G networks.
