## Overview

---

What is a 3kva uninterruptible power supply?

3kVA uninterruptible power supplies are designed to power loads up to 3kVA but the kilo-Watt loading will depend on the UPS output power factor. Typical loads for a 3kVA UPS include file servers, storage devices IT networks and VoIP telecoms systems.

What is a 1000 volt UPS (uninterruptible power supply)?

1000VA UPS (Uninterruptible Power Supplies) are used for smaller power protection applications, like backup up a few computers or EPOS. This means that they can be used by homeowners, in offices or in stores. We source UPS from a wide range of UPS systems manufacturers. You can find more information here: [Riello UPS](#) [Eaton UPS](#) [APC UPS](#).

How much power can a 3kva Ups supply?

If you are sizing your UPS load in Watts or kW (3000Watts), the UPS should be suitably rated. A 3kVA UPS may be rated at unity power factor (1PF) which means that the UPS can supply 3kVA/3kW of load. If the power factor is less (typically 0.9 or 0.8) then the Watt load should not exceed 2700W (2.7kW) or 2400W (2.4kW) etc.
