

NKOSITHANDILEB SOLAR

350kW Energy Storage Container for Tunnels

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is ingecon Sun Storage 350tl?

Awesome power density, with up to 350 kW. It features an innovative control unit that performs a more efficient and sophisticated inverter control. The INGECON® SUN STORAGE 350TL can be parallelized in order to adjust the PCS power to different battery configurations. This way, it facilitates the design of a wide diversity energy storage systems.

How can ingecon® Sun Storage 350tl be parallelized?

The INGECON® SUN STORAGE 350TL can be parallelized in order to adjust the PCS power to different battery configurations. This way, it facilitates the design of a wide diversity energy storage systems. Furthermore, it allows augmentation so old and new batteries can be mixed without accelerating the aging of the new ones.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);
