

**NKOSITHANDILEB SOLAR**

# **350kW Foldable Container for Data Centers**

## Overview

---

One stop solution, integrating racks, monitoring, cabling, power, fire control and air-conditioning systems. Pre-engineering design, 1-week fast deployment, no building required, only construction field, power a.

How many data centre containers can be built?

There are no limits to the construction of individual data centre containers, from small main data centres, to Edge and Fog installations, through to large modular cloud data centres. Individually planned containers are also supplied pre-assembled.

What is a modular data center container?

IT containers based on the modular principle. Modular data centers in containers are the perfect, scalable solution – whether individually for SME, cloud and Edge applications, or as preconfigured data center containers. Growing data volumes and escalating requirements often lead to space problems in existing IT environments.

Are container solutions suitable for outdoor sitting a big data application?

Growing data volumes and escalating requirements often lead to space problems in existing IT environments. Container solutions suitable for outdoor siting are one possible solution for this kind of Big data applications.

What is cloudpower ids1000 container data center?

To solve the troubles, Huawei launched CloudPower IDS1000 container data center, which highly integrated power supply and distribution system, environmental monitoring, cooling systems, racks, cabling, fire control, security and other infrastructure facilities in standard shipping containers. It complies with customers' diverse business needs.
