48v15000 watt high power inverter

Overview

What is a 48 volt inverter?

In other words, it is a device that can take current from a bank of batteries (48V) and convert it to the type supplied in the grid to power your appliances and devices. I suggest you use A 24-volt inverter or 36-volt inverter or 48-volt inverter when you need to power appliances over 3000 Watts.

What is a victron Quattro 48 15000?

Fast shipping and secured well in shipping crate The Victron Quattro 48/15000 is a high-capacity inverter charger designed for robust off-grid and hybrid solar systems. It features a 48V input, providing 15000VA (15kVA) output at 230V, with a powerful 200A charger and a built-in transfer switch.

What is a quattro 48 15000/200-100/100?

The Quattro 48/15000/200-100/100 is a robust and powerful 48-Volt 15,000-Watt pure sine wave inverter with an adaptive 200A battery charger and two 100A AC inputs. The inverter's output is 120V AC.

Which Inverter should I use for 230v/400v Wye (50Hz or 60Hz)?

We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz). For three phase 120V/208V applications the 120V Quattro inverters should be used. If you have questions or would like product recommendations, please contact our engineers to discuss your application in greater detail.
