50kW Smart Photovoltaic Energy Storage Container for Palau s Aquaculture Industry

Overview

With a 50kW inverter and 100kWh LiFePO4 battery pack, this product integrates energy conversion, intelligent management, and reliable safety protection into one compact cabinet. How will solar energy be produced in Palau?

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment SPEC did not leave any stone unturned to protect the pristine Palau ecosystem.

What is the Palau solar battery project?

The Palau Solar Battery Project will be the largest such project in the Western Pacific. It will lessen Palau's imported fuel dependency, a major step towards its ambitious goal of 100%.

Does Palau rely on fossil fuels?

As a small island developing state, the Republic of Palau sought to wean itself off its dependence on fossil fuel for power, which accounts for 99.7% of the country's power generation. To address this issue, Palau invited Solar Pacific Energy Corporation (SPEC), Alternergy's solar developer, to develop a clean, renewable energy source.

How can photovoltaic modules help the aquaculture industry?

Through installing photovoltaic modules on the water's surface, the aquavoltaic industry can simultaneously generate clean energy while maintaining aquaculture operations underneath.
