Abu Dhabi Solar Container 500kWh Procurement Contract

Overview

Does EWEC have a power purchase agreement with Khazna solar PV?

Following the award, the project's Power Purchase Agreement (PPA) was signed between EWEC and the two companies. Khazna Solar PV is part of EWEC's region-leading strategic plans to substantially increase solar power capacity in Abu Dhabi and the UAE.

Is solar power a viable option for the UAE's energy transition?

Ewec CEO Othman Al Ali said solar power generation represents a cost-effective, sustainable and transformative option that accelerates the UAE's energy transition. Ewec forecasts that at least 18GW of solar PV will be in operation by 2035, meeting 60 percent of the emirate's total power demand by renewable and clean energy sources.

Why is solar energy important in Abu Dhabi?

Solar energy is integral to achieving Abu Dhabi's target of producing nearly 50% of its electricity from renewable and clean energy sources by 2030. In April last year, Ewec awarded the contract to develop PV3, the 1,500MW Al-Ajban solar IPP, to a team led by EDF Renewables and including Kowepo.

Who owns the Khazna solar PV project?

Like the first three schemes, the Khazna solar PV project will involve the development, financing, construction, operation, maintenance and ownership of the plant and associated infrastructure. The successful developer or developer consortium will own up to 40% of the entity, while the Abu Dhabi government will retain the remaining equity.
