American Solar Fan

Overview

What is a solar attic fan?

A solar attic fan is a roof-mounted ventilation fan powered entirely by the sun. It actively pulls hot air out of your attic, reducing heat buildup and moisture using free solar energy (no wiring or electricity required). Key benefits: Solar attic fans can lower attic temperatures by 20-50°F, easing the load on your A/C.

Who makes the best solar attic fans?

At Amtrak Solar, we make some of the most powerful and reliable solar attic fans. Our products are built to last, with innovative engineering, durable materials, and a focus on real-world performance.

Why should you buy a solar attic fan?

Why It Matters: This fan is built for performance and priced for practicality. It moves heat and moisture efficiently, reducing your attic temp and energy bills without touching your electric panel. With smart-home control baked in, it's one of the most advanced solar attic fans on the market. No plastic parts. No noisy brushed motor.

What is a solar fan?

The term "solar fan" actually covers a wide range of devices with different purposes. A solar fan can be an attic fan, roof fan, stand-up fan, car window fan, personal fan, indoor ceiling fan, chicken coop fan, or portable fan. There are even some solar fans built into hats for construction work, such as the Miceux Hard Hat.
