What is arc flash protection in a substation?

The main purpose of arc flash protection in a substation is to protect both personnel and equipment from the consequences of an arc fault. Arc flash faults are the most devastating types of faults known in power distribution systems.

Are low-voltage switchboards vulnerable to arc flashes?

The provision of reliable power in such buildings is reliant upon the low-voltage distribution switchboards that lie at the heart of the electrical installation. Demands placed upon these switchboards, particularly as operations and infrastructure expand over time, leave them vulnerable to arc flashes.
