

# Are China's 5G base stations using Huawei

## Overview

---

Where are Huawei 5G base stations located?

Huawei has deployed its 5G base stations in several countries worldwide, including China, South Korea, UAE, Switzerland, and Canada. The deployment has had a significant impact on network performance by offering increased speed and bandwidth, improved latency, greater capacity, and enhanced coverage.

How many 5G base stations will China Mobile have this year?

China Mobile plans to operate more than 1.6 million 5G base stations this year, with 360,000 new additions. It aims to increase its number of cloud servers by more than 240,000 units and add 40,000 external data center racks. Editor: Emmi Laine.

Which countries have a 5G base station?

China: Being the home country of Huawei, China was one of the first countries to deploy Huawei's 5G base stations. The deployment has been extensive, covering major cities and regions throughout the country. South Korea: South Korea is another country that has extensively deployed Huawei's 5G base stations.

How many 5G base stations does Huawei have?

The contracts have been split into two projects, with the first covering 63,800 base stations using 2.6GHz to 4.9GHz spectrum, while the second covers 23,141 in the 700MHz band. Huawei is estimated to have secured 45,426 5G base stations worth an estimated 4.1 billion yuan (US\$574 million).
