 Environmental

Overview

Why did Argentina announce an 'emergency' in the energy sector?

The President of Argentina announces an 'emergency' in the energy sector, citing obsolescence and inadequate infrastructure. A new decree aims to review energy tariffs, involving regulatory entities and potential rate increases.

How much does electricity cost in Argentina?

The residential electricity price in Argentina is ARS 119.160 per kWh or USD 0.082. The electricity price for businesses is ARS 129.150 kWh or USD 0.089. These retail prices were collected in March 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Argentina with 150 other countries.

What does Argentina's 1.3 GW battery storage tender mean for Latin America?

Argentina's 1.3 GW battery storage tender marks a transformative leap toward grid resilience and clean energy leadership in Latin America.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.
