Asian solar Panels

Overview

Who is Asian solar?

Asian Solar is one of Southeast Asia's leading Solar Energy Firms. We are involved in design and installation of solar systems, as well as distributing solar panels from manufacturers in Thailand, China, and throughout Asia. Learn more about what we do Asian Solar has experience with diverse types of clients and installation scales.

Why are Chinese solar panels booming in Southeast Asia?

Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions. While Cambodia is still primarily an agrarian economy, solar panels were the Southeast Asian country's top export to the U.S. last year, according to data from consultancy Oxford Economics.

Why are solar panels uncompetitive in Southeast Asia?

The American Alliance for Solar Manufacturing Trade Committee also argued that Southeast Asian companies received an unfair level of subsidies, making U.S.-made solar panels uncompetitive. Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.
