# **Assembly of UPS battery cabinet**

## Overview

---

How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

Where are the cabinets in the UPS system placed?

Each cabinet in the UPS system is placed in its final installation location. The UPS (Uninterruptible Power Supply) and MBC (Main Battery Cabinet) must be installed on a level floor suitable for computer or electronic equipment. The MBC (Main Battery Cabinet) is bolted to the floor for permanent installations. All conduits and cables are properly routed to the MBC.

How to choose UPS battery cabinets?

Furthermore, the cabinets need to offer removable hinged doors so that the UPS system can be easily accessed. Doors need to be locked for safety and security. UPS Battery Cabinets have to be designed to house most front terminal batteries. Your UPS Battery Cabinets should have removable side panels so that cables can be easily installed.

What are Arimon battery cabinets?

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors.
