# **Astana 30kva-UPS uninterruptible power supply**

## Overview

---

How to install a 30 kVA ups?

The input of a 30 kVA UPS has to be connected to the main power line from a generator or utility source. An isolation switch should always be installed to provide additional safety at the UPS. The output terminals of the UPS need to be connected to the critical circuit that needs protection from power surges, sags, and interruptions.

What should I consider when buying a 30kVA ups?

One of the first things to consider when buying a 30kVA UPS is how much load it will run. These UPS can supply up to 30 kilo volt-amps of electrical power. This makes them perfect for medium-sized companies that have a lot of setting up. To select the right UPS, check how much power the machines, computers, and other equipment at work use.

What are online double conversion 30 kVA ups?

Online double conversion 30 kVA UPSs are the most prominent members of the online series UPSs. They are the most effective and reliable solution for sites that need a continuous power supply without any breaks or interruptions because they work by converting AC power to DC, then back to AC. This process completely filters and conditions the power.

How much power does a 30 kVA ups deliver?

A 30 kVA UPS can deliver up to 30 kilovolt ampere of apparent power. This is very much appropriate for medium-sized businesses or areas that use a lot of electrical machines. In other words, it can handle significant loads while offering a power factor of about 0.8. This comes to around 24 kilowatts.
