Automatic Payment Method for Solar Containerized Systems

Overview

How does a solar PV service work?

HOW IT WORKS An energy service provider rents or sells solar PV systems in exchange for regular payments through mobile payment systems. In cases of non-payment, the service provider can remotely disconnect the service. **2 BENEFITS.**

What is an automated payment system?

An automated payment system facilitates the transfer of funds between two parties, without the need for manual intervention or data entry. [Learn more.](#)

How much does a PAYG solar system cost?

d.lightKenya D.light, a United States-based company, developed a PAYG solar system that can provide lighting, charge mobile phones and power radios. The customers make a down payment of USD 25 and then make daily payments of USD 0.40 for a year, after which the customer owns the system (Maisch, 2017).

Should opensolar build cashflow at the ground floor?

“If we were starting OpenSolar today, we’d build CashFlow in at the ground floor.” This passing remark by our co-founder and CEO, Birchy, has stuck with me since we started this project. CashFlow is a brand new payments system, built for solar professionals, by solar professionals.
