

## NKOSITHANDILEB SOLAR

# Battery cabinet power distribution unit

✓ LIQUID/AIR COOLING

✓ ON GRID/HYBRID

✓ PROTECTION IP54/IP55

✓ BATTERY /6000 CYCLES

## Overview

---

What is PDU power distribution unit?

Your search term contains restricted words. Please use different keywords. As a power distribution unit, PDU provides stable and reliable power to IT racks on the outgoing side and is widely used in data centers. The product has the characteristics of modularity, high reliability, and multiple outgoing line circuits.

Why is PDU used in data centers?

It can meet the needs of different scenarios and power fields such as data centers and be used as an electric energy distribution unit. As a power distribution unit, PDU provides stable and reliable power to IT racks on the outgoing side and is widely used in data centers.

Why do you need a rack power distribution unit?

Increasing rack power density both in the data center and at the network edge means that reliable power distribution is crucial. Our innovative power distribution units and rack PDUs not only maintain power, but they also enable us to support you in any challenges your IT infrastructure might face.

What is a rack PDU?

Rack PDUs for Servers and Network Equipment The Power Distribution Unit, or rack PDU, acts as the backbone for consistent power delivery to critical IT assets. PDUs for enclosures provide proper levels of power for equipment within the rack to optimize operations and keep IT assets running smoothly.
