

NKOSITHANDILEB SOLAR

Berlin Small Solar Air Conditioner Price

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (ah):6
Rated energy (WH):76.8
Maximum charging voltage (V):14.6
Maximum charging current (a):6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (a):10
Maximum peak discharge current @10 seconds (a):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):0~+50
Discharge temperature (°C): -20~+60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100%dod): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds

Overview

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

How efficient are solar-powered air conditioners?

As you explore options for solar-powered air conditioners, understanding power source efficiency is vital for making an informed decision. These units convert sunlight into electricity, which helps reduce energy costs. Pay close attention to the solar panel's efficiency, typically ranging from 15-22% for polycrystalline and monocrystalline panels.

Are solar-powered air conditioners sustainable?

When it comes to cooling your space sustainably, solar-powered air conditioners offer a compelling solution. These units harness renewable energy to deliver efficient climate control, making them ideal for eco-conscious consumers. From portable models to those designed for vehicles, there's a variety of options to suit your needs.

What is a split solar air conditioner?

Split solar air conditioners are air conditioning system that uses solar energy to power the compressor and the cooling process. They consist of two main components - an indoor unit and an outdoor unit. The indoor unit is installed inside the room, while the outdoor unit is installed outside, usually on the roof or a balcony.
