# **Big ups uninterruptible power supply**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

What is a Megaflex ul uninterruptible power supply (UPS)?

The MegaFlex UL uninterruptible power supply (UPS) merges advanced innovation with reliable power protection. Engineered to be AI-ready, it's the perfect choice for colocation, hybrid, hyperscale and neocloud data centers, ensuring continuous power and security for critical infrastructure.
