Brand new outdoor power field in Colon Panama

Overview

A photovoltaic power station was launched in June 2023 in Colon, Panama, with the name of the House of Providence, the first non-profitable children's welfare house in Panama. Where is a new power plant being built?

It is planned in Colon, Panama. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the under construction stage. It will be developed in a single phase. Post completion of the construction, the project is expected to get commissioned in October 2024.

Where is AES colon power station?

AES Colón power station (Termoeléctrica Colón) is an operating power station of at least 381-megawatts (MW) in Isla Telfers, Colón, Panama. It is also known as Costa Norte Gas. The map below shows the exact location of the power station. Your browser is not compatible with Google Maps v3. Unit-level coordinates (WGS 84):.

Where is Cobre Panamá Power Station?

Cobre Panamá power station (Central termoeléctrica Cobre Panamá) is an operating power station of at least 306-megawatts (MW) in Punta Rincón, Coclé del Norte, Donoso, Colón, Panama with multiple units, some of which are not currently operating. It is also known as PACO power station. The map below shows the exact location of the power station.

When will Cobre Panama start generating electricity?

As of April 2016, the Cobre Panama project was 40% complete, with the \$600 million, 300MW coal-fired power plant slated to begin generating electricity in mid-2017 and full mining operations scheduled to commence in 2018. Excess power generated by the plant will be sold to the Panamanian government to supply neighboring communities.
