Brussels Communications shuts down 5G base stations for power

Overview

Is 5G coming to Brussels?

Belgium's capital city Brussels is finally on course to launch 5G services, with the service set to go live this September. Up until now, the city has effectively blocked the service from launching in the city due to its strict radiation rules, even halting a 5G pilot in 2019 due to concerns.

Why has Belgium slowed down its 5G deployment?

Several regulatory and market challenges might have slowed down its 5G deployment: Delayed 5G Auction: Belgium was among the last countries in Western Europe to allocate 5G spectrum, creating a competitive disadvantage for Brussels in network expansion.

Which 5G operators are delivering the best results in Brussels?

Brussels averaged 36% of 5G registration across tested operators, Proximus and Orange achieved results above the average with 46.24% and 43.91% respectively, as Telenet lagged significantly behind at 18.17%.

Why does Brussels lag behind other European cities in 5G quality?

Despite being the political heart of Europe, Brussels lags behind other major European cities in 5G quality. Several regulatory and market challenges might have slowed down its 5G deployment:
