Building a new energy storage industry

Overview

How will China promote the new-type energy storage manufacturing sector?

BEIJING, Feb. 17 -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging industries and the country's modern industrial system.

How will China's new-energy storage industry grow by 2027?

Photo: VCG China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation and competitiveness, and achieve high-end, intelligent and green industry growth.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical challenges remain.

Megapack is an electrochemical energy storage device that uses lithium batteries, a dominant technical route in the new-type energy storage industry. Tesla's vice-president Tao ...

New energy storage is a key technology in building a new energy system and a modern power system, and an essential driver of global green transformation. From being ...

Abstract: Against the backdrop of China's carbon peaking and carbon neutrality goals, new energy storage has become a key infrastructure and technology that supports the building of a ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

As the new energy industry accelerates, countries have high hopes for new energy storage technologies as a solution to improve energy efficiency and safety. At the same time, ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical ...

The leading role of the recent developments in critical energy storage technologies that will ensure universal energy access in a balanced and reliable way belongs to battery ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to ...

Introduction Driven by the global energy transformation and carbon neutrality goals, the energy storage industry is experiencing explosive growth, but it is also facing ...
