Canberra Off-Grid Solar Container 15kW

Overview

Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

Are 15kW solar systems worth it in Australia?

Australia is home to some of the lowest solar installation prices in the world, and 15kW solar systems – because of their size – frequently offer some of the best value of any solar PV system size.

How much does a 15kW solar system cost?

The cost of a 15kW solar system depends on a few factors, like where you live, your roof design, and your energy needs. Typically, a high-quality system will cost between \$10,000 and \$18,000 after applying government incentives and rebates. This price includes professional installation and top-notch solar components. What's the 15kW System Cost?

.

How much power does a 15kW solar system generate?

The 15kW solar system would be generating an average of 60kWh of power daily. A 15kW Solar system is usually paired with 40 to 50 Solar panels (depending on the wattage of the Solar panels offered; you only need 40 of the 370w Solar panels to get 15kW) and either a 10kW or 15kW inverter.
