Canberra off solar container grid inverters for sale

Overview

Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

What is an off-grid Solar System?

Off-Grid solar systems are self sufficient and function entirely free of the national electricity grid. They combine solar panels, inverters, batteries, and backup generators for emergencies, offering energy independence like never before. Solar panels power your home during daylight hours. Batteries handle your energy needs at night.

How reliable is off-grid solar power?

Off Grid Solar Power can be as reliable and affordable as being connected to the grid. With today's lithium battery technology combined with the new generation of solar battery system inverters and chargers, anyone can produce their own electricity, in any remote location.

Are off grid solar kits reliable?

At Off Grid Solar Kits, we have installed hundreds of reliable, high performing, stand-alone power systems Australia wide. Choosing to work with quality brands, our off grid inverters and solar chargers are reliable and work with all battery types Lithium-ion, Aquion, Agm, Tubular gel OPZV, Tesla Power Wall, and LG Chem, and Redflow.
