# Cape Town Energy Storage Power Retail Price

## Overview

---

How much does electricity cost in Cape Town?

The Cape Town electricity price varies based on a number of factors including consumption levels, the type of user (residential, commercial, or industrial), and even geographic location within the city. As of the latest update, residential electricity prices range from approximately R1.70 to R2.28 per kWh, dependent on the tier of usage.

How do electricity tariffs work in Cape Town?

Electricity tariffs in Cape Town are structured to encourage energy conservation. The pricing model is divided into different tiers: Basic Fee: This is a fixed monthly charge applicable to all customers, typically ranging from R120 to R350. Tiered Pricing: The more electricity you consume, the higher the price per kWh you pay.

How much does electricity cost in South Africa?

Basic Fee: This is a fixed monthly charge applicable to all customers, typically ranging from R120 to R350. Tiered Pricing: The more electricity you consume, the higher the price per kWh you pay. For instance, customers who consume below 1,000 kWh might pay R1.70, while those who surpass that could pay up to R2.28.

What is Cape Town's price relief?

Due to Eskom's increase, Cape Town's price relief compensates in part for the increased Services and Charges for 2025/26. Price relief will especially help high consumption households! Remember to consider the lower unit costs for electricity when calculating your new total
