Overview

Why should you buy a portable power station?

Whether you're prepping for emergencies, powering a campsite, or staying connected off-grid, a portable power station can be a reliable and clean source of energy. These compact devices have come a long way in recent years, with faster charging, longer battery life, and more versatile ports than ever before.

How much power does a portable power station need?

For basic emergency use (lights, phone charging, small medical devices), a 300Wh to 500Wh station is sufficient. To run larger appliances like a fridge or microwave, go for 1000Wh or more. Can I use a portable power station while it's charging?

Yes.

How long does a portable power station last?

Runtime depends on what you're powering. For example, a 300W station with 280Wh capacity could run a 10W light for about 24 hours or recharge a smartphone 20 times. Are portable power stations safe indoors?

.

What is the best portable power station?

The EcoFlow DELTA 2 is a standout choice in the portable power station world. It blends speed, power, and modern features in a durable package that's built to last. Whether you're powering a campsite, working remotely, or prepping for outages, it's the kind of gear you buy once and use for years to come.
