Chile mobile power storage vehicle quotation

Overview

How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could increase the scope for bond financing.

Why are project finance transactions increasing in Chile?

Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for renewable energy generators.

What is Chile's capacity remuneration scheme?

Chile's capacity remuneration scheme, which aims to incentivize investment in energy storage and ensure system reliability by recognizing capacity payments, is robust, with payment risk considered systemic by Fitch.
