What is the largest power plant in Belgium?

This is as much as five large nuclear reactors: the current Belgian nuclear power park can still supply a maximum of just under 4,000 megawatts of power. All this means that on sunny afternoons, our solar plants form the largest power plant in Belgium.

How many solar panels are there in Flanders?

There are almost 860,000 solar installations in Flanders against "barely" 150,000 in Wallonia and some 15,000 in Brussels. At peak production, this accumulated Belgian solar park produces more power than five large nuclear reactors. At present no Flemish authority has any insight into the devices that power this mass of solar energy: the inverters.
