China solar powered generator in Ecuador

Overview

How much solar power does Ecuador have?

One Request Multiple Quotes. Ecuador's installed solar capacity stood at 28 Megawatts by the end of 2019. One year down the line, the government of Ecuador has implemented new solar projects. One of these projects worth mentioning is the El Aromo photovoltaic energy project expected to cover 2.9 km² of land.

When will Ecuador start constructing a solar power plant?

In 2023, the Energy Ministry released tenders for a 500 MW renewable block (wind, biomass, solar), 400 MW Natural Gas Combined Cycle Power Plant (CCCP), and a Northeast Transmission System to supply the Ecuadorian oil system. From these tenders, only the Villonaco project has started construction as of August 2025.

Where can I get solar equipment in Ecuador?

Solarfeeds.com is home to some of the world's leading equipment suppliers. Rather than moving around requesting quotes, visit our inquiry page and place your request. Ecuador boasts ten major ports that allow you to receive equipment from any solar market worldwide if needed.

How many gigawatts will Ecuador have by 2030?

The government of Ecuador plans to achieve an overall installed capacity of 4 Gigawatts by 2030. So, the project is the first of a series of planned solar projects. As a solar installer or professional, how do you decide whether a particular market is worth your time and money?
