Chisinau s new energy storage policy is released

Overview

How many energy storage policies did China release in 2024?

China released 770 energy storage-related policies in 2024, with 77 issued at the national level. The policies primarily focus on development plans, new energy storage integration, electricity market regulation and subsidy programs.

Will China add 100 GW of new energy storage by 2027?

China aims to add more than 100 GW of new energy storage (primarily battery storage, excluding pumped hydro) by 2027, according to a new action plan presented by authorities on Friday.

Will China's energy storage industry grow through 2027?

[Photo/Xinhua] China's energy storage industry is set to experience significant growth through 2027, fueled by a combination of growing market demand and supportive government policies, according to industry experts and company executives.

How big is China's new energy storage fleet?

As of June 2025, China's new energy storage fleet had surpassed 100 GW, overtaking the pumped hydro additions for the first time, according to data from the China Energy Storage Alliance (CNESA). The new action plan, grounded in the nation's dual carbon goals, aims to grow the national new energy storage fleet to 180 GW by 2027.
