Compact power station factory in Australia

Overview

What is a Pak series mobile power substation?

PAK Series Mobile Power substation is a reinforced unit for the power transformation MV/LV and distribution. Designed with a Resistant, reinforced and compact structure to ensure high performance in isolated areas such as Tunnel, Mine and industrial sites. To facilitate handling, PAK Series can be installed on a truck, trailer or skid mounted.

What is a containerised portable power station?

Our Containerised Portable Power Station is a game-changer in providing reliable and sustainable energy solutions for remote and challenging environments. Our innovative design combines efficiency, durability, and adaptability, making it an ideal choice for industries such as mining, construction, and remote site operations.

Where are ATCO Power plants located?

ATCO Australia owns and operates two power plants in Australia, which are located in Western Australia and South Australia. Need power for your mine site?

ATCO has been providing reliable and efficient power to the Pilbara for over 10 years. As a Global Energy provider and innovator, we're always there, anywhere.

What is a portable power station?

Instagrid's portable power stations deliver reliable and sustainable energy for a range of industrial and commercial situations. Featuring quick recharging and a lightweight design, they are indispensable for any project. To learn more about our portable power solutions reach out to the friendly team at APS today.
