# **Compact power station factory in Cape-Town**

## Overview

---

Is Cape Town's power station worth preserving?

The power station, operational from the 1960s until its decommissioning in 2003, was central to Cape Town's electricity supply for decades and is viewed by heritage advocates as a landmark worth preserving—at least in part.

Why did solar MD open its first gigawatt factory in Cape Town?

Solar MD officially opened Africa's first gigawatt factory in Cape Town to support the company's commitment to developing and manufacturing high-performance energy storage solutions that maximise the potential of renewable energy resources.

Is Cape Town redeveloping its iconic cooling towers?

Source: Wikipedia. The City of Cape Town, which has been exploring the redevelopment of the site since the iconic cooling towers were demolished in 2010, now finds itself entangled in a legal and bureaucratic dispute that pits sustainable development goals against historical preservation.

What makes Cape Town a modern city?

Its architecture, both practical and robust, adopted European design principles, blending international modernism with the realities of South African industry. The power station didn't just provide energy; it embodied the aspirations of a city intent on modernization. Receive a snapshot of Cape Town's pulse in your inbox every day.
