## Overview

---

In 2025, a 20 kW solar panel system costs around \$47,600 before incentives, based on real installation data from across the country. How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home—but it'll cost you about \$55,000. Why trust EnergySage?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.

How does a 20kW Solar System work?

With a 20kW solar system, you can generate more electricity than you consume. The excess electricity can be sold back to the grid, allowing you to earn money from your solar panels. Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?
