# Do solar panels cost money

## Overview

---

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much money can you save with solar panels?

Most homeowners save around \$50,000 over 25 years. Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much does a solar battery cost?

They store the energy accumulated from the solar panels. The price varies based on the installer, application and location. Batteries typically cost \$12,000 to \$22,000, according to the Department of Energy, although smaller capacity systems are available for less. In some cases, solar batteries may be more expensive than solar panels.
