EPS battery cabinet inverter

Overview

What is an EPS power inverter?

EPS power inverters have a larger redundancy: both the incoming and outgoing cabinets are inside the EPS, and the motor loads are started with variable frequency. The casing and wires are flame retardant, and there are multiple ways to input power, which can be linked with fire protection.

What is EPs (emergency power system)?

A highly attractive EPS (Emergency Power System) targets commercial, banking and industrial applications, from ATM, CCTV, elevator to big cooling systems. Each 5KW module is built in 60A big charger. Scalable to 30KW with 6 modules, this whole system is able to reach 360A per system and shorten the charging time for over 24-hour backup time.

What are Myers EPs' illuminator hypernova inverters?

Myers EPS' new Illuminator Hypernova inverters are our sleekest and smartest three-phase units yet! The equipment has been designed with industry leading compact footprint and features many robust communication options, such as the new IoT Inverter Connect cloud connectivity solution.

What is a modular battery cabinet?

Additionally, the modular battery cabinet configurations optimize mechanical space requirements. These highly efficient systems range from 5.0KVA to 60.0KVA and are perfect for all commercial applications, including schools, data centers, and distribution centers. The New Illuminator Hypernova three phase units offer a 40% smaller footprint.
