## Overview

---

How can European policymakers help the battery storage sector?

Recommendations How can European policymakers help the battery storage sector? Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.

Is the European battery storage market ready for 2029?

Despite positive market developments, SolarPower Europe stresses that the European battery storage market needs to grow at an even faster rate to meet the rising demand for grid flexibility. A potential total volume of up to 400 GWh is projected for 2029 – an ambitious but necessary target for the energy transition.

Why is battery production important for the EU?

Batteries, widely used in the transport and energy sectors, are central to the global energy system. They will be key to the EU's clean energy transition, industrial future and strategic autonomy. Boosting the industrial base for battery production is therefore a key task for the EU.

Which country has the largest battery storage market in Europe?

Germany, Italy and the United Kingdom continue to lead the European battery storage market in 2025 and together account for almost 70 percent of newly installed annual capacity. Germany holds the largest market share with 27 percent, followed by Italy with 17 percent and the UK with 11 percent.

## EU Industrial Energy Storage Batteries

SUMMARY Batteries, widely used in the transport and energy sectors, are central to the global energy system. They will be key to the EU's clean energy transition, industrial ...

9 hours ago Germany continues to lead Europe's battery energy storage market, with 18 GW of utility-scale demand and 8 GW from commercial and industrial applications over the next decade.

Revenue stacking models - where batteries participate in energy arbitrage, grid balancing, and capacity mechanisms - are already demonstrating viable business models in ...

Revenue stacking models - where batteries participate in energy arbitrage, grid balancing, and capacity mechanisms - are already ...

15 hours ago Europe's battery storage sector is entering a period of rapid scale-up, with annual deployments set to climb from 11 GW in 2024 to 16 GW in 2025, a 45% year-over-year ...

Recycling and Collection: end-of life management of batteries: i.a. new collection targets for waste portable batteries, respectively facilitating the repurposing of industrial and ...

Welcome to our European Market Outlook for Battery Storage 2025-2029 Though the battery energy storage revolution continued to unfold across Europe in 2024, setting yet ...

This annual report analyzes developments in the European battery storage market and provides in-depth insights into key applications such as large-scale storage systems, ...

European Market Outlook for Battery Storage 2025-2029 7 May 2025 The report explores trends and forecasts across residential, commercial & industrial (C& I), and utility ...

This annual report analyzes developments in the European battery storage market and provides in-depth insights into key ...

The economics of battery storage systems (BESS) in Europe look much rosier following changes to the European Union's (EU) power pricing structure in October, with ...

2 hours ago Europe's battery energy storage system (BESS) market is expected to grow 45% year-over-year in 2025, expanding to 16 GW from a total of 11 GW as of 2024, according to an ...

Recycling and Collection: end-of life management of batteries: i.a. new collection targets for waste portable batteries, ...
