# Earth leakage breaker factory in Sweden

## Overview

---

Can earth leakage circuit breakers break earth fault circuits?

For Earth Leakage Circuit Breakers, when combined with No-Fuse circuit breakers you can break Earth-fault circuits. Some products are regionally specific; for up to date sales availability, please check your local web page. This kind of relay is an electrical self-holding type, called as compact-economic-type, and can serve to save a space.

What are earth-fault circuit breakers?

The earth-fault circuit breakers are of the electromechanical type. They are available in 2-pole and 4-pole versions type A + High immunity, protection against 8/20 wave (surge protection) and unwanted tripping, with rated fault current 30mA and 300mA.

Where is the neutral connection on the earth fault circuit breaker?

Residual current circuit breaker type B 10kA 63A 30mA 4-pole. The neutral connection location on the earth fault circuit breaker is on the right side. Multi9 is a series especially for OEM builders. Lots of accessories such as phase rails, auxiliary contacts, earth fault protection etc. make it a complete series.

What is an earth fault breaker?

The earth fault breaker is developed to protect people, animals and property in the event of direct or indirect contact. It measures earth fault current to earth. Earth fault breaker of type A for AC and pulsing DC fault currents and with the neutral on the left. 30 mA for personal protection and 300 mA for installation protection.
