**Egypt Alexandria Energy
Storage Group Project**

Overview

Does AMEA power have a solar project in Egypt?

The latest announcements bring Amea Power's total renewables capacity in Egypt to 2 GW of solar and 900 MWh of BESS. The company claims to have projects in 20 countries, with a pipeline above 6 GW and 1.6 GW currently in operation and under or near construction.

Does Scatec have a solar project in Egypt?

In a separate announcement, Norway's Scatec said it had signed a 25-year PPA with Egyptian Electricity Transmission Co. (EETC) for a 1 GW solar and 100 MW/200 MWh battery storage hybrid project in Egypt. "This will be the first hybrid solar and battery project in Egypt," said Scatec CEO Terje Pilskog.

Will a fourth FSRU help improve gas supply in Egypt?

A fourth FSRU is expected to arrive soon to help improve gas supply. In 2024, natural gas accounted for 47% of Egypt's primary energy consumption and for 81% of its power mix. The same year, Egypt imported 13 bcm of gas (including 4.4 bcm of LNG) World LNG Database offers a complete set of data on LNG markets.

Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.
