El Salvador medical equipment solar container battery

Overview

What percentage of medical equipment is used in El Salvador?

Approximately 80% of El Salvador's market is new medical equipment, and 20% is used or refurbished. New and used medical equipment can be imported into El Salvador and must be registered at the National Medicine Directorate. Used or refurbished equipment cannot be older than five years from the date of manufacture.

How is El Salvador transforming its health system?

El Salvador is continuing its efforts to modernize and transform its Integrated National Health System. The government's priorities are to resolve the shortage of medicines, improve the lack of maintenance and poor hospital infrastructure, and increase the accessibility of health services.

Who is responsible for health policy in El Salvador?

The Ministry of Health is responsible for the health policy in El Salvador. The National Medicine Directorate (DNM) is responsible for importing and commercializing medical devices, medical equipment, pharmaceuticals, nutritional supplements, natural, dental, and hygiene under the Medicine Law that entered into force in April 2012.

How do public institutions differ from private entities in El Salvador?

Public institutions differ from private entities as they only buy new equipment. Approximately 80% of El Salvador's market is new medical equipment, and 20% is used or refurbished. New and used medical equipment can be imported into El Salvador and must be registered at the National Medicine Directorate.
