Enclosure lighting solar lights

Overview

What is a led enclosure light?

LED enclosure light, 230 V AC, length: 395 mm, degree of protection: IP20, with motion detector, Socket type F (Schuko - with ground contact), including mounting accessories The light is used to illuminate control cabinets. It can be used universally due to its AC wide range input and country-specific sockets. A motion detector is integrated.

What is a split led enclosure light?

STRIPLITE LED enclosure lights have been designed to meet the criteria of illuminating industrial enclosures and cabinets. They are available either with On / Off switch or with motion sensor. Our 400 Lm version has a wide voltage range (24 V- 265 V AC / DC) which allows an universal use with only one model.

What is a 1500 lm led enclosure light?

The 1500 Lm LED enclosure lights of the SL 4905 series have a metal housing and are equipped with a motion sensor. The product range includes models with power sockets, door contact switches (as an accessory) and the option of connecting several lights via daisy chain cables together. Energy efficient and easy to install.

What makes a 400 class enclosure light a good choice?

The enclosure lights of the 400 class are characterized by optimum lighting of the control cabinet interior, even in the lower area, thanks to high-quality optics. The wide-range power supply of 24 to 240 V AC/DC enables worldwide use. The Push-in connection technology guarantees quick and easy installation of the lights.
