Energy storage cabinet explosion-proof fan base station

Overview

What is an ex fan?

Compact, explosion-proof solution for ventilation of battery charging and industrial facilities EX fan designed for use in battery-charging rooms, fume cupboards and other demanding environments where explosive atmospheres can occur. The fan combines a compact design highly resistant to environmental stressors with a reliable ATEX rated AC motor.

What are ex fans made of?

The casing of EX fans is made from casted silumin alloy. Terminal box integrated to the motor enclosure. Mounting brackets made of galvanized sheet still connected to the motor. Single phase version of the fan is also completed with capacitor. EX fan uses lightweight single inlet radial impeller with forward curved blades made from aluminium.

What are ex 3-phase fans?

EX 3-phase fans are equipped with voltage controllable, explosion proof AC motors, approved by ATEX. Motor has an integrated cooling impeller. EX fans have integrated PTC (Positive Temperature Coefficient) protective circuits with external leads for connection to a motor protection device (separate accessory).

Are ex 1-phase fans voltage controllable?

The EX 1-phase fans are not voltage controllable. If a controllable EX 1-phase fan is needed, the corresponding EX 3-phase fan must be used in combination with a pre-programmed frequency converter (#474200). Fan can be installed in any position by using preinstalled mounting brackets.
