Energy storage charging pile in St Petersburg Russia

Overview

Will Russia increase support for EV charging infrastructure investors?

On July 2nd, the Russian government announced plans to significantly increase support for investors in the electric vehicle (EV) charging infrastructure sector. Prime Minister Mikhail Mishustin signed a new resolution, which enhances the subsidies available for connecting charging stations to the power grid.

How many charging stations are there in Russia?

Operate at least 72,000 charging stations, with at least 28,000 being fast-charging stations. Pilot projects for charging infrastructure were launched in 2022, with 65 regions across the country already participating. This increased investment and strategic planning indicate Russia's commitment to supporting the transition to electric vehicles.

How much subsidy is needed for charging piles?

The resolution states, "The subsidy amount for connecting charging piles to the power grid has been increased to cover up to 60% of the designated project implementation phase costs (previously 30%), with a maximum limit of 900,000 rubles.
