# Energy storage power station electricity sales cost structure

Efficient  
Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

Intelligent  
Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible  
Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

## Overview

How to determine the capacity price of pumped storage plants?

According to “The verification method for capacity price of pumped storage plants”, the capacity price of pumped storage plants shall be determined according to the operating period pricing method.

How pumped storage plants recover their capacity cost?

The operation period pricing method of capacity price can make the pumped storage plants recover its capacity cost, and the relevant income sharing mechanism can promote the enthusiasm of the pumped storage plants to participate in the power market transaction.

What is the net present value of pumped storage plant?

When the market-oriented transition of the pumped storage plant is not considered, the net present value of the project obtained by this method is 118.6811 Million USD. As an independent market subject, the participation of the pumped storage plant in power trading increases its economic benefits.

Does pumped storage plant participation in power trading increase economic benefits?

As an independent market subject, the participation of the pumped storage plant in power trading increases its economic benefits. The results verify the effectiveness of the phased price mechanism and economic accounting model designed in this paper.
