# **Ethiopia solar container communication station Wind Power Construction Project**

## Overview

---

What is Ethiopia's largest onshore wind power project?

Addis Ababa, December 3/2023 (ENA): Ethiopia's Ministry of Finance and AMEA POWER Partner build the Horn of Africa's largest 300 MW onshore wind power project, which represents a significant milestone in the country's renewable energy sector.

How will Ethiopia diversify its energy mix?

Looking ahead, Ethiopia is set to further diversify its energy mix by scaling up solar and geothermal projects, complementing its strong hydropower and wind investments. The government is also focusing on strengthening public-private partnerships to accelerate project implementation and attract global expertise.

Where is Aysha wind power located?

An expansive 18,000-hectar wind farm located in Ethiopia's Horn of Africa region, the Aysha Wind Power Project represents a significant milestone in the country's renewable energy sector. AMEA POWER's extensive experience in developing large-scale renewable energy projects makes it a great partner for this venture.

Will Aysha wind power project be the largest wind energy project in Africa?

The Finance of Ethiopia announced the signing of a landmark agreement with AMEA POWER for the construction of the Aysha Wind Power Project. The Aysha wind energy project is poised to become the largest wind energy project in the Horn of Africa after investing 600 million USD.
