European community uses 500kW collapsible shipping containers

Overview

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

What is compact containers?

Compact Containers serves the global shipping and intermodal industry with an efficient, low-cost means to transport containers by Road, Rail, or Sea. Discover the future of cargo logistics with Compact Containers. Our SeaFold 40' collapsible containers redefine efficiency & cost savings.

How many shipping containers are still used today?

Over 170 million shipping containers have been manufactured globally since the 1950s (UNCTAD, 2023). Yet, only a fraction remain in active maritime service. As container fleets evolve and trade routes shift, many containers are retired early due to damage, inefficiency, or changing standards. Discarding them is costly and wasteful.

What is a 5-in-1 40' high cube shipping container?

The world's first 5-in-1 40' high cube shipping container that will revolutionize the intermodal shipping industry by providing significant cost benefits, improving empty container repositioning efficiencies, and lowering harmful CO2 emissions.
